EDUCATION

Ph.D of Computer Science	**George Mason University**
Anticipated Graduation: May 2027	
Master of Science of Computer Science	**George Mason University**
Anticipated Graduation: December 2024	
Bachelor of Science of Computer Science, minor in Statistics	**Miami University**
August 2018 - May 2022	Cumulative GPA: 3.75

EXPERIENCE

Research Engineer | *RobotiXX Lab, George Mason University* | Fairfax, VA, USA   *August 2022 – Present*
- Built the first complete navigation and manipulation interface for *Fetch Manipulator Robot* using **Python** and **ROS**.
  - Enabled **real-time** full body control tasks with low-level joint control.
  - Executed visual object tracking through the application of the **AprilTag3D** algorithm.
  - Applied **Numpy** for matrix transformations between robot frames.
- Engineered innovative wearable for direct access to robot sensory data during human navigation tasks.
- Directed a **13**-member team in gathering over **100** km and **20** hours of navigation data for robot learning.
- Featured in the Proceedings of the 2023 International Conference on Intelligent Robots and Systems.

Research Engineer | *Department of Electrical Engineering, Miami University* | OH, USA   *August 2020 – December 2021*
- Optimally controlled group of drones (UAVs) using **PyTorch** implementation of *Deep Deterministic Policy Gradient*.
- Achieved policy convergence with a **20%** higher accumulated user satisfaction during UAV transitions.
- Enabled UAV group to adapt to dynamic user distribution using trained policy.

Research Intern | *Data Analytics for Complex Human Behaviors Lab* | OH, USA   *May 2020 – August 2020*
- Attained **90%** model accuracy in machine learning-based prediction of suicide attempts and ideations.
- Built the largest causal map on Adverse Childhood Experiences (ACEs) and suicide, using JavaScript and Python.
  - Included **946** interrelationships and **361** concepts.
  - Provided insights on the complex interplay between factors correlating to suicidal behaviors.
- Featured in the Proceedings of the 2021 International Conference on Advances in Social Networks Analysis and Mining

TECHNICAL PROJECTS

LinkedIn Posts Tracking | *Code*   *May 2023 – Present*
- Built an ETL pipeline that scrapes **100 MB** of LinkedIn job posts per second into a **MySQL** database on **EC2** instance.
- Designed **S.T.A.R** schema database storing over **1000** job posts from **450** companies using **MySQL** and **Python**.
- Extracted job details and requirements (compensation, skills, experience) using Regex and Named Entity Recognition.
- Delivered personalized job recommendations by aligning users' resumes with each job posting.

Self-driving car on Miami University's campus | *Code* | *Video*   *May 2023 – Present*
- Segmented driving lanes, detected traffic lights, and identified pedestrians with a **Raspberry Pi** camera using **OpenCV**.
- Optimized wheel steering and vehicle acceleration with closed-loop controller using GPS and visual inputs.

IEEE/ACM International Conference on Advances in Social Networks Analysis and Mining, 2021

SKILLS

- **Programming languages:** Python, SQL, C++, Java, JavaScript.
- **Frameworks:** SQL Server, MySQL, AWS (S3, EC2), Pytorch, TensorFlow, ROS, Numpy, Pandas.
